

FRAC PUMP UNIT

Engineered Excellence

We work carefully, from the ground up, with all of the major OEMs to deliver an integrated pressure pumping platform that is purposefully created for its application. No other company has brought this level of attention and detail and it shows – a frac pumper from Propell is quieter, more stable, safer, easier to service and costs less to operate.

PERFORM

Integrated Controls

A highly functional control package integrates the control panel, touch screen, remote suitcase and equipment batteries in a single operational station.

Configurability

Designed and built to allow multiple configurations through chassis rail clamp technology, universal component mounts and a convertible axle system that can be switched between a wide spread tandem and a tridem.

PROTECT

Guards

Moving parts are securely guarded, including our proven, proprietary drive shaft guard which is engineered to contain the drive shaft in the event of a failure.

Confidence at Heights

Industry-leading slide-out fenders, stairs, and integrated walkways provide unmatched access and egress for extremely safe operation and maintenance.

SPECIFICATIONS

**Custom configurations available upon request*

2500 Quintplex Frac Pump

Trailer

- Length 53'
- Width: 8' 6"
- Height: 13' 6"
- Weight: 80,000 lbs

Engine

- CAT 3512E Tier IV Final

Transmission

- CAT TH55

Cooling System

- Cube Style radiator

High Pressure Pump

- *QWS2500 Quintplex

*QWS2500 Quintplex

- 2500 HP Power End with log-style suction manifold
- Max pumping pressure: 15,000 psi
- Stainless Steel Fluid End 10" Center with 4-1/2" plungers
- Automatic plunger grease lubrication system

Pump-Down

Centrifugal Pump

- 150 psi rated suction manifold
- 4" Butterfly valves
- Capable of 20 barrels / minute at 50-100 psi

Keeping Operators Safe

Every Propell product is designed with the operator in mind.

From guards, safety rails, ergonomic access and egress to the most up-to-date environmental regulations and emissions, all Propell equipment solutions prioritize the end user's safety.

PERFORM. PROTECT. PROPELL.
